WORK EXPERIENCE

[Re-Designing The Arab Contractors Medical Center Website](#)

Medical Application - Redesign Website.

July 2023

- 1) The website has several issues that impact user experience. The pages take a long time to load, which makes navigation difficult and slows down the user's experience. Additionally, users have difficulty accessing the medical center's services, specializations, articles, and news. The website's design is outdated and needs significant modifications to improve functionality and user experience.
- 2) The redesign aims to provide a more professional and engaging online presence for The Arab Contractors Medical Center, with a clear emphasis on user experience and accessibility.
- 3) Features a modern and user-friendly interface, with a focus on enhancing the user experience for Arabic-speaking visitors. The design includes various sections such as the landing page, medical services, doctors' profiles, and appointment booking. The color palette is primarily blue and white, with some contrasting colors for emphasis.

[Easy And Safe Life With QR Technology.](#)

GRADUATION PROJECT

Team Leader - UI Developer | *GRADE A+*

May 2021

- I led a team in developing a project that utilized QR code technology to create a secure and convenient user experience. Through this project, I gained valuable experience in project management, teamwork, and technical skills such as coding and software development.

- 1) Kroshiyat seeks to solve the problem of lack of sale of handmade and crochet products providing
- 2) An online platform for sellers and buyers to find and purchase the best products easily and at prices suitable for all budgets
- 3) Conducting user research, user persona & stories
- 4) Creating wireframes, mockups, and prototypes
- 5) User flow, sitemap, visual design
- 6) Testing and iterating on designs based on feedback
